

Product-Led Checkout Rescue: Exec Blueprint

LEAD PM

Senior PM, Roamly Groups

TARGET LAUNCH

Q2 Pilot (SJV, SDL, LIS)

THE VALUE PROP (BEACHHEAD)

"Lock private group experiences with zero credit risk or payment chasing."

Executive Snapshot

The Problem: High drop-offs at checkout. Solo planners refuse to front \$1k+ on personal cards, while sequential bookings fail if slots sell out mid-flow.

The Solution: Friction-free split-booking. Planners lock slots for 24 hours; participants pay individually via a no-login web link.

Strategic Stance: Compliance over democracy. Eliminate planning debates. Planners set the schedule; Roamly collects the funds.

Messaging Architecture & Playbook

To the Organizer: *"Pick the trip. Set the clock. Let us collect."* Relief from financial risk and active chasing via dynamic, automated 24h countdowns.

To the Participants: *"One tap, no app required."* Frictionless checkout via mobile wallets (Apple/Google Pay) with instant mathematical splits.

To the Host Community: *"Guaranteed buyouts."* Holds are secured by an auto-cover backstop. Strict 24h cutoff protects calendar liquidity.

Target Audience

Beachhead Persona	The Reluctant Milestone Organizer (Maids of Honor, Best Men, 30th Birthday Planners). Holds full booking authority for 6–10 adults, but bears 100% of the financial liability and emotional overhead of chasing payments.
Core Value Prop	"Lock in private, vetted group experiences with zero personal credit risk and zero payment chasing."
Strategic Stance	Compliance over Democracy. Eliminate in-app voting and collaborative itinerary debates for V1. Empower the organizer to set the plan, enforce the clock, and let Roamly collect the funds.

Acquisition & Guardrails

In-Product Intercepts: Show a "split-bill" hold modal instantly when carts show 4+ guests to rescue potential basket abandonment.

Social Share Triggers: WhatsApp status cards showing real-time slot tallies (*"3 of 8 spots paid"*) to pressure secondary sign-ups.

Hard Guardrails (V1): Absolutely no in-app voting or group forums. No mandatory app installs. Strict 24h expiration with zero hold extensions.

Positioning Statement

For lead planners coordinating milestone celebrations, **Roamly Groups** is a frictionless group reservation engine that holds private bookings while collecting individual payments. Unlike traditional platforms that force one person to front the bill, Roamly eliminates personal liability.

Messaging Pillars

To the Organizer

"Let Roamly collect the money." Eliminates fronting costs, awkward requests, and drives action via a 24hr countdown.

To the Participants

"One tap, no app required." Frictionless checkout via Apple/Google Pay, direct cost splits, and zero sign-up requirements.

To the Host Community

"Guaranteed buyouts." Protects high-demand inventory from hanging in limbo via auto-cover guarantees.

Targeted Channels

On-Platform Interception

Intercepts users looking at 4+ guests or private buyouts with high-impact "split the bill" modal offers.

Paid Search & Social

Target high-intent queries (e.g. "bachelorette party boat") directly to tailored group-ready packages.

Contextual Share Triggers

Automated dynamic status cards for WhatsApp/iMessage ("3 of 8 spots paid") to drive secondary peer referrals.
